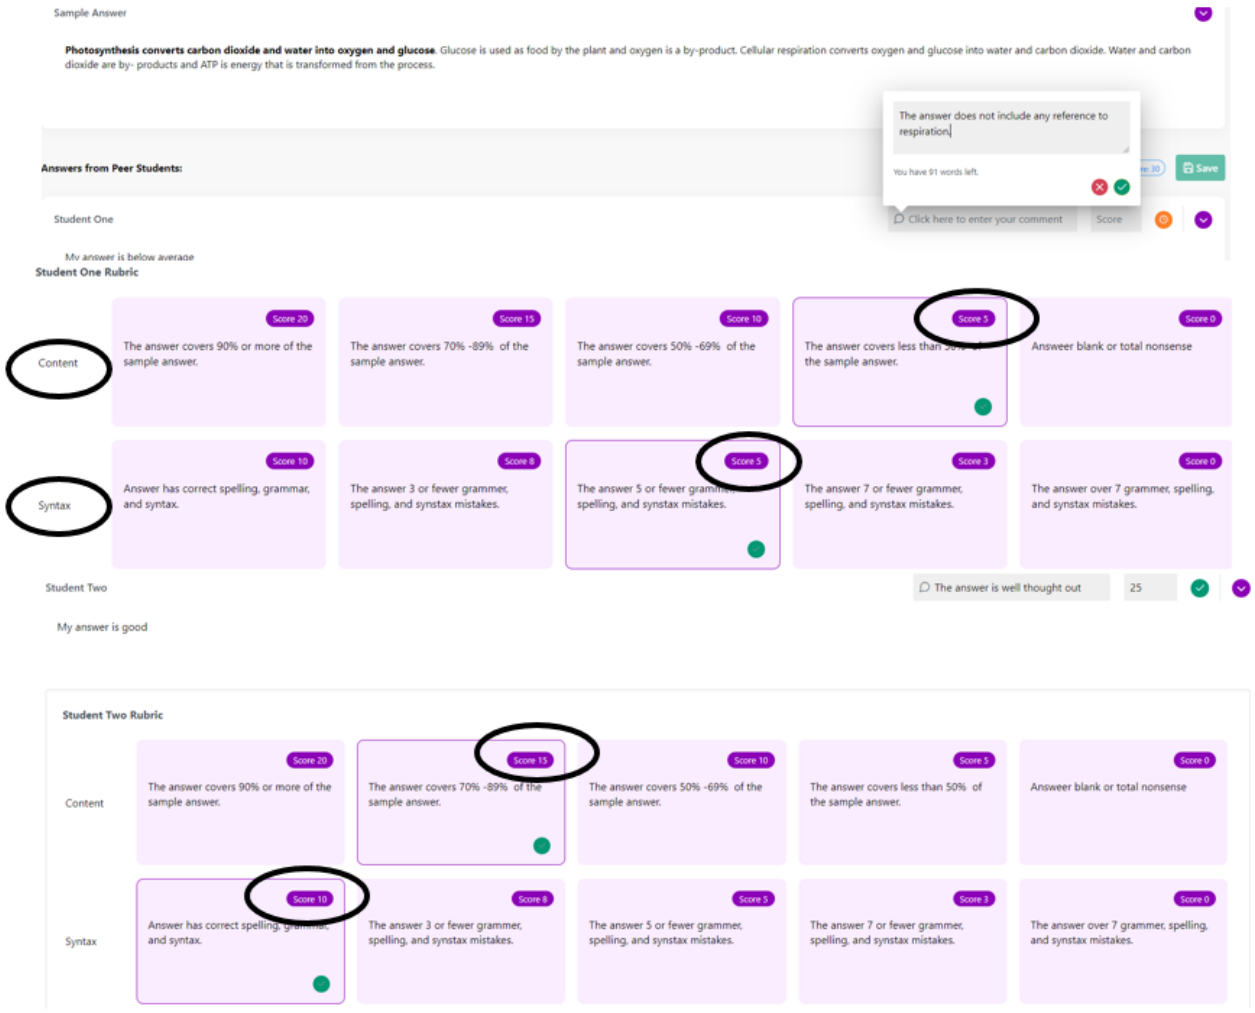
Completing the Student Peer Review process



Step 3: In this case the teacher assigned two assessments to be reviewed by the peers. The reviewer will compare the student answer to the sample answer and click on the appropriate score based on the clickable rubric. For student one **Content** the reviewer clicked on 5 points and for syntax 5 points for a total of 10 points out of 30 possible. Student 2 received a total of 25 out of 30.

Tips: The process is anonymous, and the students DO NOT know who reviewed their answers. The reviewer can leave helpful comments. Reviewers should remember that the student can make a request to the teacher to adjust the score if they believe it to be unfair. Reviewers are given extra points for COMPLETELY reviewing the assessments.
